

CREATE A COLLAGE WITH COLLETTE

Collect - Have fun finding all sorts of materials to use. Look for different colors, textures, shapes, and sizes. Have fun finding something new in everyday materials - this is a great way to recycle!

Take a Chance - Toss down pieces with your eyes closed, then see where they fall. Glue these in place and look for ways to add more to create a picture.

Have a Dress Rehearsal - Select a few pieces and try different arrangements. Think of it as a practice - a way to try different arrangements and combinations.

Do the Upside Down Test - When you think you are finished flip your collage over and make sure all the pieces are stuck. Anything that falls off needs a bit more glue.

Stick with It - Create every day and have fun trying new things. All artists improve with practice.

Stick Together - Set up materials and invite family and friends to create collages too.
